Innovior (PVT) LTD is a forward thinking technology company dedicated to delivering innovative digital solutions and empowering future innovators through robotics education. With a strong commitment to excellence, we bridge the gap between modern software development and hands on technological learning.

TECHNOLOGY SOLUTIONS

On the software solutions side, Innovior specializes in designing and developing smart, scalable, and user friendly systems tailored to meet diverse business needs. Our expertise includes web and mobile application development, system automation, data management solutions, and customized enterprise software. We focus on enhancing efficiency, improving accuracy, and enabling organizations to achieve digital transformation with confidence.

Institute (IITS)

Innovior Institute of Technology Studies operates a robotics and technology education institute aimed at nurturing young minds and aspiring engineers. Through practical, project based learning, we provide training in robotics, electronics, programming, and innovation. Our goal is to equip students with real world skills, creativity, and problem solving abilities required in today's technology driven world.

OUR VISION

To be a trusted technology and education partner, recognized for innovation, quality, and impactful solutions that transform businesses, careers, and society.

OUR MISSION

- Deliver high quality software solutions tailored to client requirements
- Provide professional, industry relevant training programs to develop skilled talent
- Leverage emerging technologies such as Artificial Intelligence, Data Analytics, and Cloud Platforms.
- Build long term partnerships through professionalism, transparency, and continuous support.

OUR DIVISIONS

1. Technology Solutions Division – Innovior (Pvt) Ltd

- The Technology Solutions Division creates modern software systems that help organizations work faster, reduce manual work, and use technology to grow.

Core Services

- Custom Software Development
- Web & Mobile Application Development
- AI & Machine Learning Solutions
- System Analysis & Business Analysis
- Cloud-based Solutions & System Integrations
- Software Maintenance & Technical Support

Key Solutions

- Smart Educational Platforms (AI-powered learning systems)
- Enterprise Management Systems
- Data-driven Decision Support Systems
- Automation & Digital Transformation Solutions

2. Institute & Training Division (IITS) – Innovior Institute of Technology Solutions (IITS)

- The Institute & Training Division is the education branch of Innovior. It helps students and professionals gain the skills needed for modern IT jobs and connects learning with real industry requirements.

Education Services

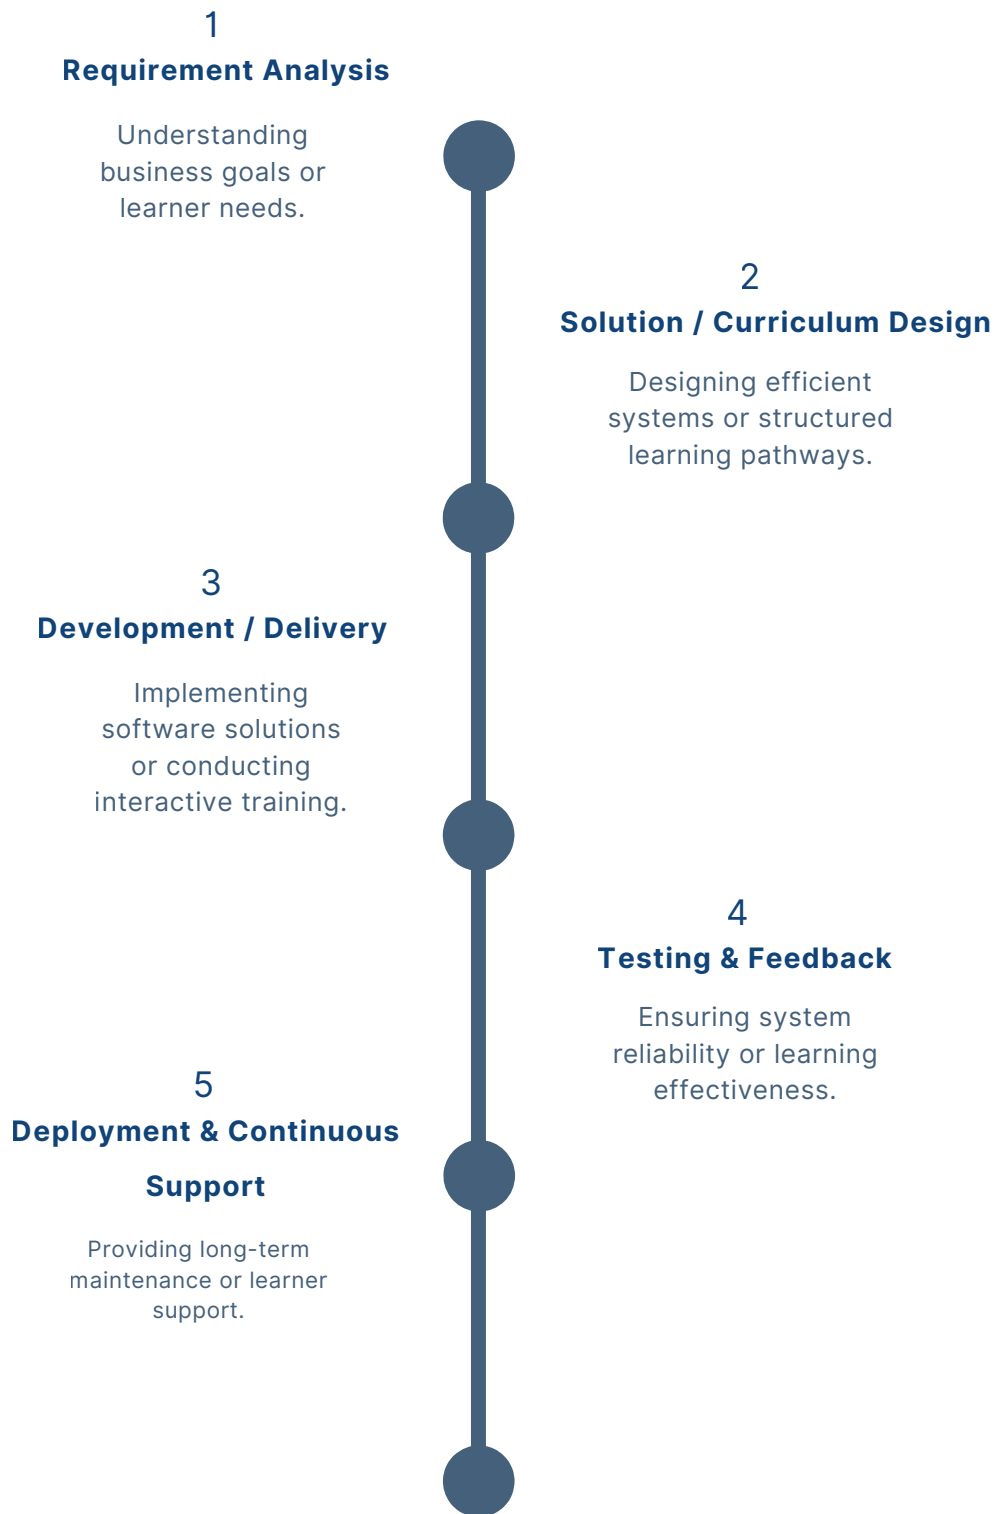

- Professional Certificate Programs
- Workshops & Technology Bootcamps
- Corporate Training Programs
- Career-oriented Learning & Mentorship

Educational Approach

- Practical, hands-on learning with real-world projects
- Curriculum aligned with current industry practices
- Focus on emerging technologies such as AI, Cloud, IoT, and Software Development
- Continuous guidance and mentoring from industry experts

Our Approach

OUR TEAM

Consultants

Strategic advisors – external/internal high level guidance

MR. SANDARUWAN HERATH

MR. THILINA BANDARA

MS. HASANTHI YAPABANDARA

General Manager & Tech leader

Overall company operations & leadership, Head of technical strategy & architecture decisions

MR. U PRADEEPKUMAR

MS. EASHANI KARUNATHILAKE

Business Analyst & Project Manager

Aligns business needs with technical solutions and manages project execution from planning to delivery.

MS.DILANI DISSANAYAKE

Quality Assurance Engineer

Testing, quality control, ensuring system reliability

DEVELOPMENT TEAM

MR. ASHAN JAYATHISSA

ASSOCIATE SOFTWARE ENGINEER

MR. DILSHAN KUMARA

ASSOCIATE SOFTWARE ENGINEER

IITS TEAM

MS.IRESHA RAJAPAKSHA

Academic Coordinator and Instructor

Manages academic planning, scheduling, and coordination while ensuring high quality learning standards across programs. Delivers engaging lessons and hands on training, guiding students to develop practical skills and achieve academic success.

OUR PRODUCTS

01. Distribution System

Technology

React, Node.js

Description

System for managing mobile phone distribution, inventory, and sales to retail shops.

Key Features

- Purchase and inventory management
- Store and sales tracking
- Credit and cheque handling
- Mobile returns management

2. Library Management System

Technology

Laravel (Caravel)

Description

Multi-site library system with admin, librarian, and guest roles. Automates book and member management with barcodes.

Key Features

- Admin: user management
 - Librarian: book CRUD, member management
 - Guest: search books and view details
 - Barcode generation for books and members
- 

3. POS System

Technology

PHP/Laravel, MySQL

Description

A point-of-sale system for clothing stores with full inventory, sales, and user management.

Key Features

- User Management
- Product Management
- Stock Management
- POS Interface
- Transaction Management
- Security
- Extras

4. Learning Management System (LMS)

Technology

Laravel

Description

Online education platform for students and lecturers with course, quiz, and media management.

Key Features

- Students: enroll courses, take quizzes, view results, watch videos
 - Lecturers: create quizzes, manage courses, upload videos, live streaming
 - Admin: full control over users, courses, and media
 - Integration with YouTube and document upload drive
- 

5. SocialFlow – Enterprise Social Media Platform

Technology

React, Node.js, MongoDB, Amazon Web Services, Redis Ltd.

Description

Social media management platform for scheduling posts and tracking performance across multiple platforms.

Key Features

- Multi platform posting (Facebook, Instagram, LinkedIn, YouTube, WhatsApp)
- Analytics dashboard
- Role based team access
- Secure authentication

6. Auditorium Booking Management System

Technology

React, NestJS, MongoDB

Description

Web based system for managing auditorium bookings with approval workflows and real time updates.

Key Features

- Multi auditorium booking management
- Multi level approval process
- Payment and invoice tracking
- Real time notifications & reports
- Bilingual support and secure role based access

7.Student Management System

Technology

Laravel, MySQL, QR/Barcode hardware integration

Description

A modern, modular ERP solution designed to automate academic administration and library management for institutions. It replaces manual record keeping with high speed digital workflows, from student attendance to professional A4 academic reporting.

Key Features

- Dual-Module System
- Smart Attendance
- Advanced Grading
- Professional Reporting.
- Digital Identity
- Lending System

Why Choose Innovior?

- Expertise in both software and IT training
- Skilled and experienced team
- Industry-focused solutions and courses
- High-quality, secure, and reliable
- Support after delivery and training
